PROJECTS

Online Pet Adoption Platform – Full Stack Web Design Project:

- Led a team to design and develop a responsive website for online pet adoption.
- Built complete front-end and back-end architecture, enabling user registration, pet listings, and adoption workflows.
- Integrated database functionality for dynamic content management and secure data handling.
- Ensured cross-browser compatibility, optimized UI/UX, and implemented validation for seamless user experience.

TECHNICAL SKILLS

- **Programming language:** Python (Basics)
- **Tools:** Visual Studio, MS Excel
- **Databases:** SQL (Basics)
- **Creative Skills:** Video Editing

ACHIEVEMENTS

- Coordinated and hosted multiple technical and promotional events as part of the Brain Masters Club under CETA, demonstrating leadership, teamwork, and event management skills.
- Served as NSS coordinator; actively participated in community outreach camps, helping villagers adopt mobile technology and digital tools.
- Played a key role in organizing and promoting Mohana Mantra, the college's flagship three-day fest, by leading class-level promotions and coordinating event logistics.
